Yargullen	Automated site-specific irrigaiton	2018-19	A trial was conducted to evaluate UAV imagery-based yield prediction and automated irrigation control strategies from soil-water and crop stress sensors. The trial site is a variable-rate centre pivot irrigation machine at the Leahaven property (Neil Nass) in Yargullen. This trial was part of the CRDC-led Rural R&D for Profit project 'Smarter Irrigation for Profit'.	Alison McCarthy, Centre for Agricultural Engineering, University of Southern Queensland	<a href="mailto:mccarthy@usq.edu.au">mccarthy@usq.edu.au</a>	0458845858
Jimbour, Jondaryan	Inversion Sensing Towers	2018-19	Development of a spray drift hazard identification system	Graeme Tepper
